SUPPLIED PARTS

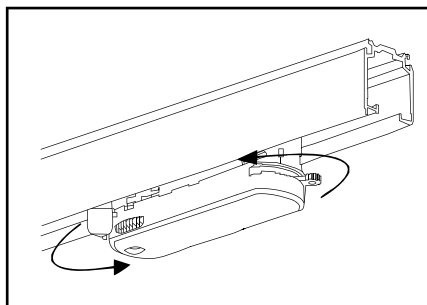

Light Fixture

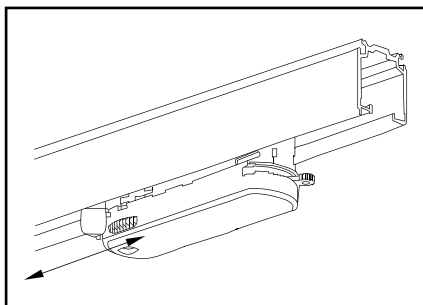

Caution:

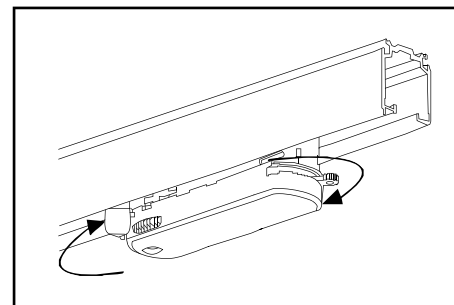

Ensure the Lighting Track and Track Mounted Spot are of a compatible input voltage. ie. 230V
The incorrect power supplied will result in a damaged luminaire

1. Secure the luminaire to the lighting track by sliding the lever at each end of the track adapter, around the opposite side.

2. Adjust the phase by using the scroll wheel on the side of the track adapter.
The installation is now complete.

3. To release the luminaire from lighting track, slide the lever at each end of the track adapter around to the opposite side.
